Meeting records Transcript Recording

Summary

Project costing review and currency correction with document preview updates

Project Costing Distribution Fix
Consensus reached on correcting fund distributions to flow properly to previous stages instead of building upward from stage 5.

Currency and Balance Display
Agreement made to update the main currency to CFA Franc and ensure the outstanding balance reflects remaining funds.

Document Preview Functionality
Request acknowledged to make documents previewable directly on the platform rather than forcing downloads.

Decisions

Aligned

- **Stage cost allocation configuration** The system will stick to the exact amounts allocated to specific stages rather than incorrectly distributing costs starting from stage five onwards.

- **Project outstanding balance display calculation** The overview outstanding amount will reflect only what is left based on the project distribution rather than the total outstanding.
- **Project currency standardization** The main project currency will be set to the correct local project currency (CFA Franc) instead of USD.
- **Platform document preview functionality** Project documents will be made previewable directly on the platform itself instead of being downloadable.

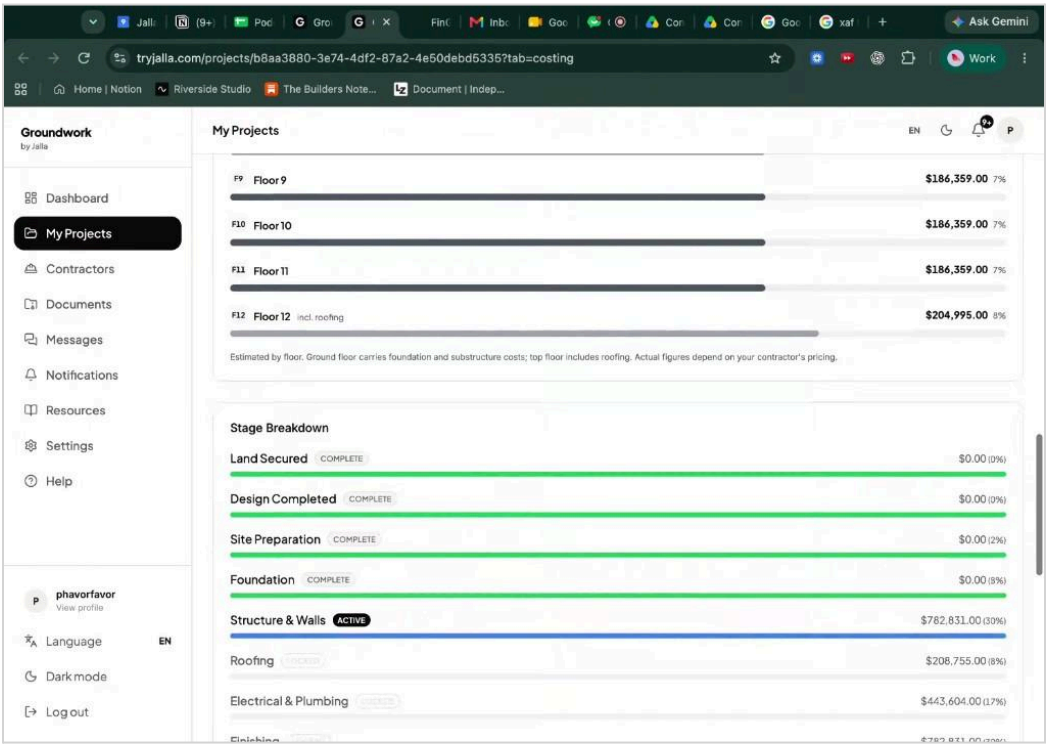

Next steps

- ☐ [Favour Nwachukwu] Update Currency: Set the project currency to CFA Francs to match the project requirements.
- ☐ [Favour Nwachukwu] Fix Outstanding Balance: Configure the outstanding balance calculation to reflect only the remaining project funds rather than the total amount.
- ☐ [Favour Nwachukwu] Adjust Distribution Flow: Update the cost distribution logic to flow into previous stages instead of only current and future stages.
- ☐ [Favour Nwachukwu] Enable Document Preview: Implement a preview feature for documents to eliminate the need for downloading files directly from the platform.
- ☐ [The group] Schedule Meeting: Arrange a follow up call with Edgar to identify any remaining issues.

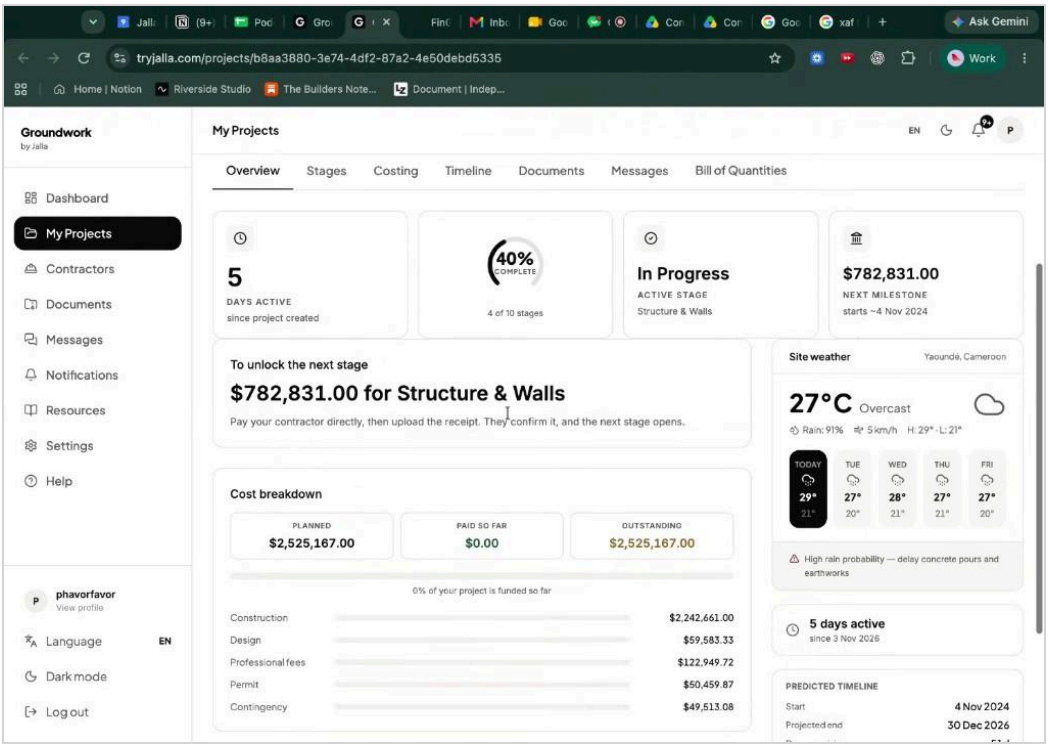

Details

Project Costing and Stage Distribution: Philip n. Tete points out that the project costing incorrectly distributes funds starting from stage five onwards, walking through running totals that include figures close to $800,000, $200,000, $400,000, and $700,000, approaching a total of $2.3 million. Favour Nwachukwu agrees that this is a mistake and acknowledges that the platform should stick to the specific amounts

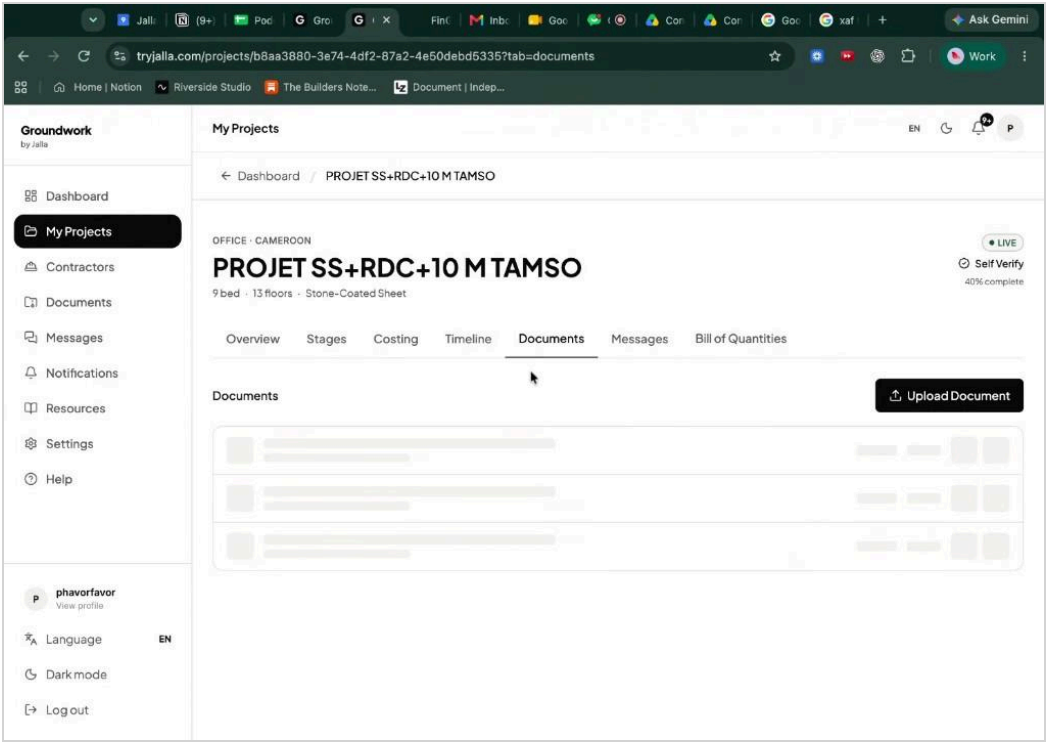

allocated to each stage rather than reading stage 1 120 incorrectly. They reach a consensus that the distribution must be corrected to flow properly to previous stages rather than only building from current stages upward (00:00:00) (00:02:11).

Project Currency and Outstanding Balance Display: Philip n. Tete identifies issues with the financial overview, noting that the total outstanding amount incorrectly calculates based on the entire total rather than just what is left for the project. Additionally, Philip n. Tete highlights that the main currency is mistakenly displayed in USD instead of CFA Franc, which explains previous complaints raised by Edgar. Favour Nwachukwu and Philip n. Tete agree to update the main currency to CFA Franc and ensure the outstanding balance reflects only the remaining project distribution (00:01:11).

Document Preview Functionality: Philip n. Tete raises a concern regarding document handling, stating that documents such as the bill of quantities should be previewable directly on the platform rather than being downloadable. Favour Nwachukwu acknowledges this request to change how documents are accessed by users (00:02:11).

Edgar's Feedback and Next Steps: Philip n. Tete explains that Edgar's complaints were caused by a combination of a communication gap between Edgar and Ruth, alongside the previously discussed currency and breakdown errors. Philip n. Tete states that once these specified fixes are implemented, they will be prepared to connect with Edgar on a call to identify any additional issues (00:03:13).
