

URL Directory

Every address on the platform, who it is for, and what it does · 9 October 2026

Use `https://www.tryjalla.com` — with the `www`. The bare `tryjalla.com` answers a redirect to the `www` host, so both appear to work. But every redirect is one more step that can drop a code out of a sign-up or invitation link, so the `www` form is the one to share.

A contractor onboards at `/contractor-signup` and a verifier at `/verifier-signup` — one page each. Neither uses the client sign-up page. A contractor can open their page directly; a verifier needs the link we email them.

Contractors

Both kinds of contractor onboard at the same URL: `https://www.tryjalla.com/contractor-signup`. You can send a partner straight there — nothing to email first, no code to read out. What differs is only how they came to us.

	An applicant	A partner
How they reach us	Fills in the form at <code>/contractor-apply</code>	We already know them; they bring their own clients
What we do	Interview, then approve at <code>/admin/applications</code>	Interview
How they get the link	Emailed automatically when you approve	You send them the URL, or they type it
Where they sign up	<code>/contractor-signup</code>	<code>/contractor-signup</code>
Listed in the directory clients browse	Yes — published when you approve them	No — you publish them from <code>/admin/contractors</code> if you want them listed

An approved applicant's email link carries a one-time code — `/contractor-signup?t=...`. It greets them by name and ties the account to their application and the directory listing you published. They never see or type it.

A partner opens the same page with nothing after it and fills the form in. **Signing up this way grants no access to any project** — that comes only from being brought onto one — and does not put them in the directory clients browse, which only you can publish to. So the page is safe to hand out: anyone who signs up uninvited sees an empty workspace and nothing else.

Every URL a contractor uses

URL	WHAT IT IS	WHO CAN OPEN IT
<code>https://www.tryjalla.com/contractor-apply</code>	Apply to join. Public page carrying the application form	Anyone
<code>https://www.tryjalla.com/contractor-signup</code>	The onboarding door. Create the account	Approved applicants, and partners
<code>https://www.tryjalla.com/auth/login</code>	Sign in, every time after that	Account holders
<code>https://www.tryjalla.com/work</code>	Their home — what needs doing now	Contractors

https://www.tryjalla.com/work/projects	Every project they are on	Contractors
<a href="https://www.tryjalla.com/work/projects/<project-id>">https://www.tryjalla.com/work/projects/<project-id>	One project: stages, evidence, progress	Contractors on that project
https://www.tryjalla.com/work/payouts	Where they get paid. Given once, used on every project	Contractors
https://www.tryjalla.com/profile	Their name, phone and password	Account holders
<a href="https://www.tryjalla.com/invite/<token>">https://www.tryjalla.com/invite/<token>	Accept a client's invitation to a specific project	Whoever holds the link

A contractor sees a project only after being invited to it, so a brand-new account correctly shows an empty list until then.

Verifiers

Verifiers have no public application page, by design. A verifier's sign-off is what releases a client's stage payment, so the role is never self-served — we interview the engineer first, then invite them.

- 1 We interview them.** No URL; this happens off the platform.
- 2 We invite them** from <https://www.tryjalla.com/admin/verifiers>, using the "Invite a verifier" panel at the top. Enter their name and email.
- 3 They onboard** at <https://www.tryjalla.com/verifier-signup> — the link in that invitation email. The heading and the button both say "Sign up as a verifier". They set their own password; staff never choose one for them.

Re-sending an invitation to the same address re-sends the link they already have, rather than creating a second live one. Opening `/verifier-signup` without a valid invitation shows no form at all.

Every URL a verifier uses

URL	WHAT IT IS	WHO CAN OPEN IT
https://www.tryjalla.com/verifier-signup	The onboarding door. Create the account	Invited engineers, from their email link
https://www.tryjalla.com/auth/login	Sign in, every time after that	Account holders
https://www.tryjalla.com/verifiers	Their home — the stages waiting on them	Verifiers
<a href="https://www.tryjalla.com/verifiers/<assignment-id>">https://www.tryjalla.com/verifiers/<assignment-id>	One stage: the evidence, and their decision	The assigned verifier
https://www.tryjalla.com/profile	Their name, phone and password	Account holders

A verifier sees a stage only after being assigned to it, and assignment happens inside the project's own workspace, not from the verifier directory.

Admin and staff

Staff sign in at <https://www.tryjalla.com/admin/login>. **There is no admin sign-up page and no Google sign-in there** — both deliberately, since either would be a way to grant yourself staff access. An admin account is created by another admin.

Everything below needs an admin role. Opening one of them while signed out sends you to the staff sign-in and brings you back afterwards; opening one while signed in as a client or contractor sends you to your own dashboard. Nobody sees a half-loaded admin page.

GETTING IN, AND THE OVERVIEW

URL	WHAT IT IS
https://www.tryjalla.com/admin/login	Staff sign-in. The only way in
https://www.tryjalla.com/admin	Overview: what needs attention today
https://www.tryjalla.com/admin/action-center	The full queue behind the overview's preview
https://www.tryjalla.com/admin/analytics	Numbers across the platform
https://www.tryjalla.com/admin/audit-log	Who did what, and when

PEOPLE

URL	WHAT IT IS
https://www.tryjalla.com/admin/users	Everyone with an account
https://www.tryjalla.com/admin/users/new	Create an account for someone. Pick client, contractor or verifier. Hands you a one-time password to give them
https://www.tryjalla.com/admin/clients	Clients specifically
https://www.tryjalla.com/admin/contractors	The contractor directory
https://www.tryjalla.com/admin/verifiers	The verifier directory, and where you invite a new verifier
https://www.tryjalla.com/admin/team	Staff and their roles. Read-only on purpose
https://www.tryjalla.com/admin/applications	Contractor applications waiting on a decision
<a href="https://www.tryjalla.com/admin/applications/<id>">https://www.tryjalla.com/admin/applications/<id>	One application: review, approve or decline
https://www.tryjalla.com/admin/waitlist	People who asked to be told when we launch
https://www.tryjalla.com/admin/inquiries	Jalla Management enquiries

PROJECTS AND THE WORK

URL	WHAT IT IS
https://www.tryjalla.com/admin/projects	Every project
https://www.tryjalla.com/admin/projects/new	Create a project, including for a managed client
<a href="https://www.tryjalla.com/admin/projects/<id>">https://www.tryjalla.com/admin/projects/<id>	The project workspace: stages, team, money, conversations
https://www.tryjalla.com/admin/reviews	Stage submissions awaiting a decision
https://www.tryjalla.com/admin/site-updates	Progress posted from site

https://www.tryjalla.com/admin/budgets	Budget and rate settings
https://www.tryjalla.com/admin/drafts	Projects someone started and abandoned
https://www.tryjalla.com/admin/requests	Client requests

MONEY

URL	WHAT IT IS
https://www.tryjalla.com/admin/finance	The financial picture
https://www.tryjalla.com/admin/finance/inflows	What clients have paid in
https://www.tryjalla.com/admin/finance/disbursements	What has gone out to contractors

MESSAGES AND SYSTEMS

URL	WHAT IT IS
https://www.tryjalla.com/admin/inbox	WhatsApp and message threads with clients and contractors
https://www.tryjalla.com/admin/notifications	What the platform has sent
https://www.tryjalla.com/admin/support	Support tickets and deletion requests
https://www.tryjalla.com/admin/crm	CRM sync status
https://www.tryjalla.com/admin/integrations	Connected services
https://www.tryjalla.com/admin/settings	Platform settings

Clients

Clients are the one group who sign themselves up, at <https://www.tryjalla.com/auth/signup>. A Jalla Management client does not: we create their account at </admin/users/new> and hand them a one-time password.

URL	WHAT IT IS
https://www.tryjalla.com/auth/signup	Create a client account
https://www.tryjalla.com/auth/login	Sign in
https://www.tryjalla.com/auth/reset-password	Ask for a password reset link
https://www.tryjalla.com/onboarding	First-run setup, straight after signing up
https://www.tryjalla.com/dashboard	Their home
https://www.tryjalla.com/projects	Their projects
https://www.tryjalla.com/projects/new	Build a new project — the estimate wizard
<a href="https://www.tryjalla.com/projects/<id>">https://www.tryjalla.com/projects/<id>	One project: stages, costs, documents, team

<a href="https://www.tryjalla.com/projects/<id>/takeoff">https://www.tryjalla.com/projects/<id>/takeoff	The contractor's bill of quantities for that project
https://www.tryjalla.com/contractors	Browse contractors and request quotes
https://www.tryjalla.com/payments	What they have paid and what is due
https://www.tryjalla.com/documents	Their files and certificates
https://www.tryjalla.com/upgrade	Change plan
https://www.tryjalla.com/resources	Guides on building
https://www.tryjalla.com/notifications	Their alerts
https://www.tryjalla.com/profile	Name, phone, password, dark mode
https://www.tryjalla.com/help	Contact support

Public pages and free tools

No sign-in, nothing to create. These are safe to share with anyone.

URL	WHAT IT IS
https://www.tryjalla.com/	The landing page
https://www.tryjalla.com/pricing	Plans and what they cost
https://www.tryjalla.com/jalla-management	Enquire about the managed service
https://www.tryjalla.com/contractor-apply	Apply to join as a contractor
<a href="https://www.tryjalla.com/verify/<certificate-id>">https://www.tryjalla.com/verify/<certificate-id>	Check a stage certificate is genuine. Anyone with the code can verify it — a bank, a buyer, a lawyer
https://www.tryjalla.com/privacy	Privacy policy
https://www.tryjalla.com/terms	Terms of service

THE PLANNING TOOLS

URL	WHAT IT IS
https://www.tryjalla.com/tools	All four tools
https://www.tryjalla.com/tools/budget	Estimate what a build will cost
https://www.tryjalla.com/tools/stages	What the stages of a build are
https://www.tryjalla.com/tools/milestones	Plan milestone payments
https://www.tryjalla.com/tools/tracker	Track progress against a plan

Everything above is live CONFIRMED 9 OCT

Migrations 104, 105 and 106 were applied to production on 9 October 2026, and each one was confirmed against the live database. Every URL in this document works today, including /work/payouts, /verifier-signup and the partner route into /contractor-signup.

The checks also confirmed the access rules hold in production: the two pages that greet someone before they have an account can read just that one invitation, while claiming an account, issuing an invitation and granting a role are all refused to an anonymous caller. Invitation tokens are not readable or listable by anyone.

SIDEBAR ITEMS WITH NO PAGE BEHIND THEM NOT BUILT

Four admin sidebar entries are deliberate placeholders — they appear in the navigation but have no screen yet. Worth knowing before anyone clicks one in a demo.

- <https://www.tryjalla.com/admin/inspections>
- <https://www.tryjalla.com/admin/tasks>
- <https://www.tryjalla.com/admin/site-managers>
- <https://www.tryjalla.com/admin/agents>

ONE THING THAT IS STILL MANUAL

A verifier's credentials — their discipline, registration body and city — have no screen yet. Inviting them creates the account and grants the role correctly; those three fields stay blank in the directory until we build a form for them.
